

# LUCROS-F

## SWEETENS THE PAYOUT

### Last year growers saw increased sugar with Ambrosia-F...

This year we have a product designed specifically for the sugar beet market. Lucros-F is specifically formulated with Boron for superior root development leading to stronger, healthier growth & increased sugar content in sugar beets. In field trials we have seen extractable sugar increases from 0.5 to 1.5 percentage points. For best results apply Lucros-F 5 - 6 weeks prior to harvest when foliage is still green & lush.
