TMR Nutrient Program

TMR-DP is a total balanced nutrient product intended to be used as a soil applied portion of a calculated fertility management program. It may be used alone or in combination with other TMR or other NACHURS ALPINE SOLUTIONS analysis, to meet the nutrient requirements of the specific crop. It can also compliment soil applied & strip-till systems.

Suggested use rates vary from 6-10 gallons/acre according to crop & nutrient needs.

Addition of EDTA chelated micronutrients may be of added benefit at recommended rates. ENHANCED CRN & FORTIFIED CRN are suitable additives for additional Nitrogen.

Contact a qualified TMR or NACHURS ALPINE SOLUTIONS representative for questions regarding additives.

Guaranteed Analysis

Total Nitrogen	2.0%
Ammonical Nitrogen	2.0%
Available Phosphate (P ₂ O ₅)	8.0%
Available Potash (K ₂ O)	11.0%
Available Sulphur "S"	1.2%

This product contains Humic acid which is used to enhance nutrient release & for its ability to absorb nutrients into the soil solution for increased plant uptake.

Plant Nutrient Sources:

Phosphoric Acid, Ammonium Polyphosphate, Potassium Chloride, Potassium Thio-Sulfate & Humic Acid

Density: xxx kg/L
xxx lb/U.S. gallon
